PROJECTOR

SCENARIO ANALYSIS

1.0 PROJECTOR NOT DISPLAYING

Solutions

- | | |
|---|---|
| 1.1 Projector not turning on | -ensure projector is properly plugged into a working outlet |
| 1.2 Projector is overheating | -clean the filter and vent of any dust |
| 1.3 Projector lamp is burn out | -inspect the lamp light |
| 1.4 Light on projector is blinking | -standby mode or turning off |

PRE-MORTEM

- Blind user
Solution: can be accompanied by other people for using the projector
- Using projector outside
Solution: it can be used outside as long as there is shade
- Projector's body that is made of glass
Solution: if the body is made out of glass, there should be case that will protect the projector.
